EXPERIENCE

Amazon — Software Development Engineer

NOV 2020 - PRESENT

Build the next generation of creative (advertisement) data management, migrating consumers away from non-regionalized service/datastore to a modern, regionalized architecture.

Support Image Creative template, which results in ~25 billion impressions a quarter. Design and build solution allowing H1 ad placement of Image Creative on the retail site (www.amazon.com).

Child Inclusion Fund — Co-founder, Developer

OCT 2020 - PRESENT

Co-found charity that focuses on funding the 'non-essential' costs associated with school (think: field trips, book fairs, picture day, musical instrument rentals) for local under-privileged families.

Vanguard — Software Developer

JUL 2016 - NOV 2020

Manage 5 junior developers, providing advice on their careers, one-on-one mentoring, and performance reviews.

Build two core user experiences, one for prospects to become Vanguard clients, and another for clients to transfer assets into their Vanguard account, both leveraging Angular and NgRx

Replicate over 500 million rows of relational data (IBM DB2) to a non-relational database (AWS DynamoDB), leveraging Attunity, AWS Kinesis, and AWS Lambda.

Develop, maintain, and support two Spring Boot-based microservices, each handling over 750,000 requests per day.
